

Procedure for giving Area 51 webmaster access to District sites using Wordpress and the Meeting Guide Plugin.

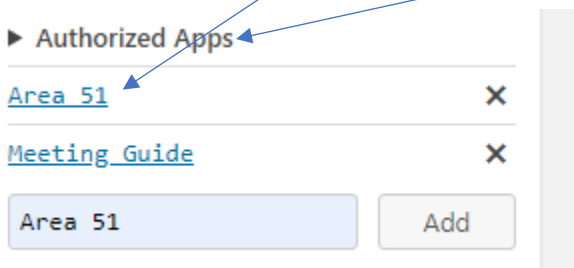

Login to your district site as an admin and navigate to meetings > and click on import & Settings-

On the right side under settings > Authorized Apps Type a description like “Area 51” Click on the Add button

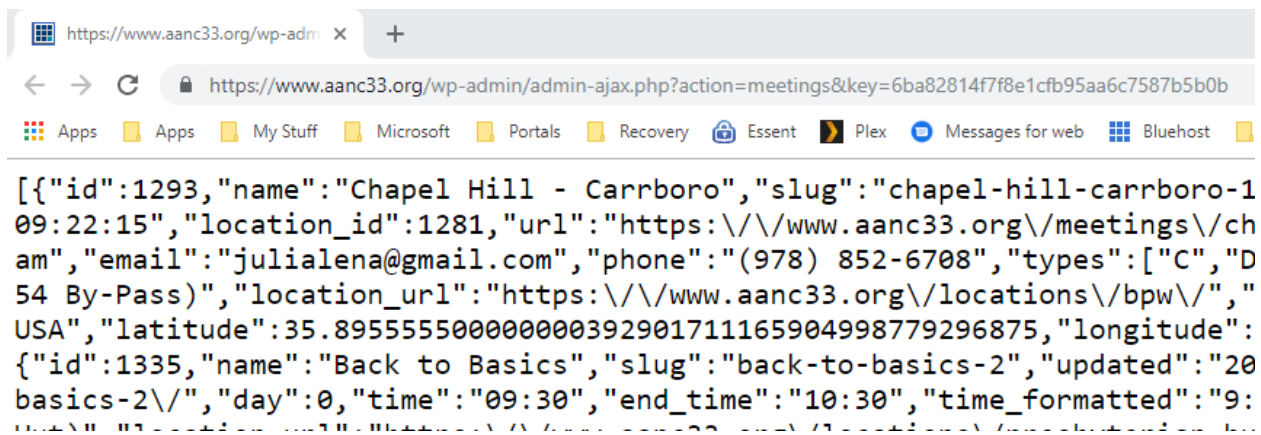

This will add a link under the “Authorized Apps” section-

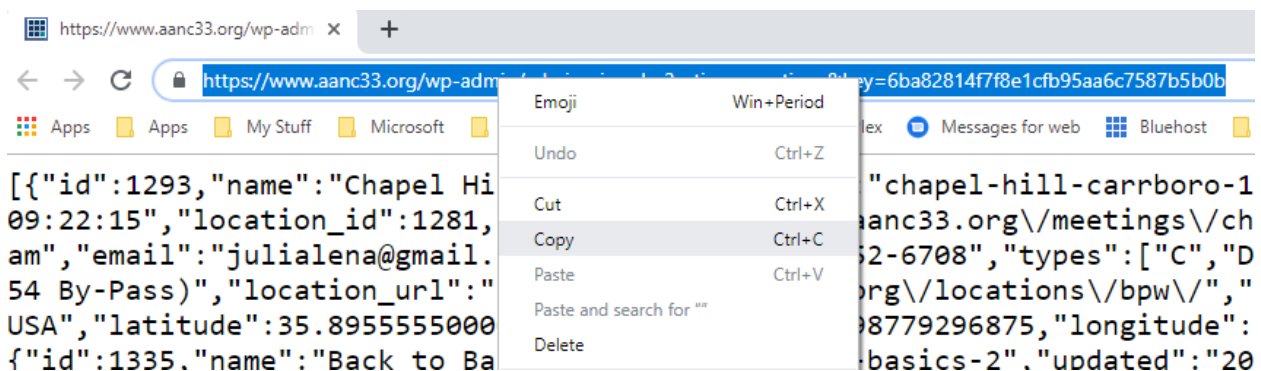

Click on the Link

This will open a new browser tab with a long string of data in the browser window –

Highlight the URL, right click and copy the URL.

The URL is the secure link I need to access the data and set it up on aanorthcarolina.org, it will display the meetings just as the meeting guide plugin displays them on your site.

<https://aanorthcarolina.org/meetings/>

Please do not delete the Area 51 link from your config, it will be used again and again to refresh the Area 51 website the same way it is used to update the meeting guide app.

Paste the URL in to an email along with your name and district number so we can keep an account of who has joined and who helped set it up for future possible issues or changes to the system and send it to webmaster@aanorthcarolina.org and I will take care of the rest.

If you have any questions please feel free to contact me-
